

**Mr X Football 2024**

Football is here! Before turning to the 2024 season, let’s look at how the Website’s picks performed in 2023. If you’ve followed me in the past, you know I NEVER predict success, much less guarantee it. The record is what the record is (and I’ll stack the 80% MLB season totals on Czabe’s shows up against anyone!) All I’ve ever said since the start of the website in 2019, or the podcasts (since 2018) is this: *“I’ll tell you what I BET, and you can follow along if you want.”* It really doesn’t matter how many good years in a row there are, what about NOW? Listeners always ask, “how was last year”? So, I’ve summarized the picks from last year below. Remember, I use “units” (1, 2, 3) to weight picks. Even though “3’s” are rare, there are a few. So “Units” consider both the weighting AND the 10% juice on losses too! If someone doesn’t count losses as 110%, that’s just misleading!

**NFL 2024**

**Mr. X NFL**

All games	55-30-1	(64.7%)	
Units	80-44	(64.5%)	+31.6 units
Teasers	6–8	(42.8%)	-2.8 units
<b>All NFL</b>			<b>+28.8 units</b>

**X2’s NFL**

All Games	35 - 31	(53%)	
Units	56 - 45	(55.4%)	+6.5 units
Props	22 - 10	(68.8%)	+11 units
<b>All NFL</b>			<b>+17.5 units</b>

**NCAA Picks**

**Mr. X**

All Games	58-58	(50%)	
Units	83-77	(51.9%)	-1.7 units
\$line/3dog Parlay	3 - 11		+43 units

*Note: the dogs won outright 22 of the 42 games, to hit 3 of the 14 parlays. So many subscribers have asked why don't I just play each dog on the \$ line, rather than parlay the 3 teams? Yes, it's a lot of losses (11 weeks), but the hits are big and make it worth it in the long run.*

Rover & Overs were 2-0-8 (meaning hit 2-0 twice, went 1-1 eight times and never went 0-2! That's the theory behind it, lots of 1-1 outcomes where we lose the "juice", but much better shot of 2-0 than 0-2! I always say 5 (or 10) times a regular play, so at 5 units that makes this +16 units on the year. I am not sure how many of the 10 plays were to the GREEN plan vs last second VIP emails, but that's how the Rovers did.

#### X2's NCAA

All Games	38-32 (54.3%)	
Units	54-47 (53.5%)	+2.3 units

Will I do as well in 2024? I'd surely say no because that's a hard number to repeat, but we are damn sure going for it!

The Czabecast picks rallied late but finished at a measly 10-10! This is just another reason why I won't release website picks early in the week. Late picks are just always are better than early ones!
